

## **HW3: Due Tuesday, July 27th**

**This IS the complete assignment!**

All of the old final exam problems can be found here:

<http://www.math.upenn.edu/ugrad/calc/m240/oldexams.html>

I've come to the conclusion that it will take me way too long to type up the problems for those that don't have the book. I won't collect problems from the book for grades but I will assign them for practice. The only problems that you need to turn in to be graded are those from past finals with asterisks and the problems I write myself. The rest will be good practice for this quizzes/tests!
