Math TA Recruitment 2016-2017 for New TAs

If you are interested in being a Teaching Assistant for any of the introductory Calculus courses (Math 103 to Math 240) during the 2016-2017 academic year, please fill out our online application at [http://goo.gl/forms/lKg8kJcXFz](http://goo.gl/forms/lKg8kJcXFz). (If you have previously TAed a course for the Penn Math Department, you do not need to submit this application; instead, send an email to Monica Pallanti (<pallant@math.upenn.edu> expressing your interest for 2016-2017.)

There are no fixed prerequisites to be a TA beyond a love of teaching and demonstrated knowledge of the course material. You do not need to have taken the course you are TAing, although it helps. You do not need to be a Math major. Our students come from all over the University, and our TAs do too.

As a TA, your duties will include teaching weekly recitation students, grading weekly homework assignments, and holding office hours. New TAs are also required to attend and pass a three day TA training course in August (usually held just before the start of classes). In addition, the applicants we hire whose native language is not English are required to pass the University's SPEAK test. Information on the test can be found at [http://www.sas.upenn.edu/elp/ITA](http://www.sas.upenn.edu/elp/ITA).

You will also be required to help proctor and grade exams, and should plan on being available for several days after the course's final exam. The expected time commitment is 12 hours per week.

We expect to begin reviewing applications and interviewing candidates in early April. We cannot promise to consider applications submitted after April 15.

If you have any questions, please contact Prof. Gressman (<gressman@math.upenn.edu>), who is coordinating Math TA recruitment for the Fall.
