The Oral Examination in Combinatorics

September 24, 2014

If the student’s major area is combinatorics then the examination will consist of Module #1 below, plus one of the remaining modules. If the minor area is combinatorics then the subject matter will be Module #1.

• Module 1 (enumerative):
  Wilf “generatingfunctionology”: Chapters 1,2,3,5.
  Stanley “Enumerative Combinatorics”, vol. 1, 2nd edition: Chapter 1 (except sections 1.6 and 1.10), Chapter 2 and sections 3.1-3.8.

• Module 2 (algebraic):
  Stanley “Enumerative Combinatorics”, vol. 2: sections 7.1-7.17
  Macdonald “Symmetric Functions and Hall Polynomials”: sections 1.6, 1.9

• Module 3 (analytic):
  Pemantle-Wilson “Analytic combinatorics in Several Variables”, Chapters 3-10 (with Chapter 2 as background).
  Other useful sources include: Flajolet-Sedgewick “Analysis of Algorithms”, Dobrushkin “Methods in Algorithmic Analysis”

• Module 4 (probabilistic):
