Math 110, Spring 2015

pre-hwk 01

MML homework due MON 19 January 11:59PM

READINGS:

Read Unit 1 of the coursepack.

Review the first three sections of Chapter 1 of the textbook. There are a lot of MML problems assigned from this chapter over the next two weeks. This material is supposed to be review, meaning we will not spend class time on it but will check, via MML, that you know it.

Read Section 3.11 of the text. This is also supposed to be review but we will be spending some class time on it because it is very important for the rest of the semester.

Read Sections 2.2–2.5 of the text. Also read Section 4.5 of the text. These sections will be treated as new material even though they should be familar. Note: there are just a few MML problems from these sections, and they are PRE-problems, meaning that you are responsible for reading the book well enough to get a handle on these problems. Later we will be doing more problems from these sections, based on what we have taught you; you are supposed to be able to accomplish enough on your own to do the problems on this assignment.

MML PROBLEMS:

Do the first MML assignment. I am listing them here FYI so you can see where they are in the book in case you need to review any of the material in the book. You do not need to look at this list if you don't want to: the problems are in the MML assignment online.

1. MML Section 1.1 # 4, 7, 11, 18, 27, 30, 33, 55, 55, 61, 69
2. MML Section 1.2 # 19, 21, 23, 26, 57
3. MML Section 3.11 # 3, 11, 13, 15, 17
4. MML Section 2.2 #1, 23, 53, 63;
5. MML Section 4.5 #13, 33, 41
