very clear. He was also lenient with his grading system and took the time to answer any questions we had about assignments. I believe that he did an exceptional job!

Quizzes were hard but corrections were great.

tyler is awesome

Tyler was a great TA. He was pretty funny and made calc somewhat interesting. The only negative about him was that he sometimes had days where he was in a rotten mood and it soured class down a little. He also missed a couple of days and the replacements weren't nearly as good as he was so that sucked.

Tyler was always available and made all of his students feel comfortable about asking questions. He was an awesome TA because he was always upbeat about having us retain the material.

Tyler was always willing to answer questions.

Tyler was amazing! I went to office hours regularly and he never failed to be there and was always a TON of help. He made it easy to understand what I was confused on and seemed to love helping us and teaching us. Could not have had a better TA!

Tyler was excellent at making the material much easier to understand, and I felt like I learned much more from him than the course instructor.

Tyler was great and was really helpful in understanding the concepts that I wasn't so sure of. He was interesting and very engaging.

Tyler was very helpful and was always willing to make himself available.

With board work and explanation of the material I came to understand the material more thoroughly. He explained the material in a different way than professor Krat which helped relate to us on a lower mathematical level.
